PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and deploying scalable, secure, production-ready web applications using React, Next.js, Node.js, and PostgreSQL. Proven ability to design RESTful APIs, implement authentication systems and deliver enterprise-grade features in Agile teams, with a focus on performance and maintainability.

EDUCATION

PES University

Bachelor of Technology in Computer Science and Engineering

Bengaluru, Karnataka

2021 – 2025

Alvas Pre-University College

Class XII (KCET Rank: 1220, 99%)

Moodbidri, Karnataka

2019 – 2021

CORE TECHNICAL SKILLS

Frontend: React, Next.js, AngularJS, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend and APIs: Node.js, Express.js, RESTful APIs, JWT Authentication, API Security

Databases: PostgreSQL, MySQL, MongoDB (SQL and NoSQL)

Languages: JavaScript, Python, C++, Java

Tools & Platforms: Git, GitHub, VS Code, PyCharm, Postman, Vercel, Render

Engineering Concepts: System Design Basics, Unit Testing, Agile Development, Data Structures and Algorithms, Error Handling & Debugging, Basic CI/CD exposure

EXPERIENCE

GenAI COE Intern | KPMG Global Services, Bengaluru

| January 2025 – June 2025

- Improved frontend load performance by 35% by refactoring AngularJS components and optimizing REST API consumption.
- Delivered production-ready features in Agile sprints using Git-based workflows, ensuring compliance with enterprise security and quality standards.
- Enhanced application stability by resolving frontend-backend integration issues through systematic debugging and peer code reviews.

PROJECTS

AdSync AI – AI-Powered Landing Page Personalization Engine (*Next.js, Groq API, Axios, Cheerio*), April 2025

- Built a structured AI pipeline to align landing page content with ad intent, improving message consistency.
- Designed a planner → generator → verifier workflow with validation to control LLM outputs.
- Developed a real-time preview system to compare original vs personalized content, ensuring safe and interpretable changes.

LeadCraftAI – AI Lead Intelligence Platform *Next.js, Node.js, Express, Groq LLM, MongoDB, Cheerio*, March 2026

- Built a full-stack AI platform that analyzes Instagram business profiles and generates personalized cold outreach messages.
- Implemented Instagram scraping and a two-stage LLM pipeline to extract business insights and identify website opportunities.
- Developed a lead management dashboard to store analyzed businesses, prevent duplicate analysis, and track outreach status.

TaskFlow – Collaborative Task Manager *Full-Stack (Next.js, Node.js, PostgreSQL, Prisma, Socket.io)*, December 2025

- Built a real-time collaborative task manager supporting concurrent users using WebSockets with Socket.io.
- Designed scalable REST APIs using a Controller–Service–Repository architecture with JWT authentication.
- Deployed and tested the application using Vercel and Render, improving backend reliability through unit testing.
